

MUNOG Artificial Intelligence (AI) Usage Policy

Adopted into the Rules of Procedure of MUNOG 2025

Dear participants of MUNOG 2025,

as technology is rapidly evolving, the use of artificial intelligence (AI) has become more accessible to all of us. While it can be a powerful tool, Model United Nations conferences are designed to foster critical thinking, independent research, and authentic debate. MUNOG 2025 is committed to ensuring a fair and intellectually honest environment for all its participants. The following policy outlines the permitted and prohibited use of AI tools by delegates and chairs.

Policy for Delegates

Delegates are strictly prohibited from using AI tools such as ChatGPT, Microsoft Copilot, Google Gemini and similar platforms to create official documents or speeches. This includes, but is not limited to, position papers, working papers, draft resolutions, as well as opening speeches or other speeches during debate.

To ensure compliance with this policy, several implementation measures will be enforced. All delegates must sign a written declaration upon submission of any working paper or draft resolution, confirming that no AI tools were used in its creation. Additionally, chairs are authorized to conduct random checks using AI-detection software, such as GPTZero, to assess the authenticity of submitted texts.

Any document flagged as more than 90 percent likely to be AI-generated will prompt a direct conversation between the chairs and the delegate who submitted the text. Based on this discussion and further assessment, the chairs may decide to exclude the document from further use in committee sessions.

Other violations, such as the proven use of AI tools without disclosure, will result in formal consequences. A first offense will lead to an official warning. If a second offense occurs, the delegate will be excluded from consideration for Best Delegate awards.

Final decisions regarding violations and sanctions rest with the chairs of the respective committee.

Policy for Chairs

Chairs may use AI tools at their discretion for administrative and organizational purposes only. Chairs are not permitted to use AI to evaluate delegate performance or generate feedback.

➔ We **urge** all delegates to enforce this policy, as it is **essential to upholding academic integrity** and **safeguarding** the learning objectives of MUNOG. We trust in the honesty and sense of **responsibility** of our participants to **ensure authentic diplomacy** throughout the conference.
